Allowable Subject Matter

1. Claims 1-49 and 58-76 have been allowed.
2. The following is an examiner's statement of reasons for allowance: In claim 60, applicant has claimed a fluid distribution system comprised of the following: (1) four or more mixing zones, (2) a first feed component source in fluid communication with each of the four or more mixing zones, (3) a set of four or more first-feed-component flow restrictors also providing fluid communication between the first feed component source and one of the four mixing zones, wherein each of the flow restrictors have a flow resistance that varies relative to each other; and (4) a second feed component source. The Examiner did not find prior art that teaches or suggests such a system.

In claim 1 applicant has claimed a reaction system comprised of a parallel flow reactor having four or more reactors each comprised of a surface defining a reaction cavity, an inlet port and an outlet port as well as a fluid distribution system comprised of the system of claim 60. In claim 58 applicant has claimed a reaction system comprised of a reactor comprised of a surface defining a reaction cavity, an inlet port and an outlet port as well as a fluid distribution system similar to the system of claim 60. The fluid distribution system of claim 58 only require the elements of the system needed for two or more mixing zones – not four.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
